

Survey Questionnaire

Enhancing Cybersecurity Resilience in SMEs

(Aligned with NIST Cybersecurity Framework and ISO/IEC 27001)

Section A: Background Information

1. What is your role in the organization?

- Employee
- Manager/Supervisor/Owner ✓
- IT/Technical Staff
- Other (please specify)

2. How many employees does your organization have?

- 1-10 ✓
- 11-50
- 51-250
- More than 250

3. What industry does your organization operate in?

- Retail/Wholesale
- Manufacturing
- Professional/Business Services
- Healthcare
- Education
- Other (please specify) ✓ Beauty and Personal Care

4. How would you rate your organization's overall use of technology?

- Basic (email, office tools only)
- Minimal (some specialized tools, limited IT staff) ✓
- Competitive (regular use of enterprise systems)
- Integrated (formal IT department, moderate automation)
- Strategic (advanced systems, strong IT governance)

5. Does your organization have a dedicated IT or cybersecurity staff member?

- Yes
- No ✓
- Not sure

6. How many years of experience do you personally have in your current role?

- Less than 1 year
- 1-3 years
- 4-7 years
- More than 7 years ✓

Section B: Cybersecurity Awareness (NIST CSF: Protect)

7. Which of the following cyber threats are you familiar with? (Check all that apply)

- Phishing emails ✓
- Malware (viruses, spyware, ransomware) ✓
- Password attacks (guessing, credential stuffing) ✓
- Insider threats
- Denial of Service (DoS/DDoS) attacks
- Data breaches ✓

8. Do you know the correct steps to take if you receive a suspicious email?

- Yes
- Somewhat ✓
- No

9. How confident are you in recognizing a phishing attempt?

- Very confident
- Somewhat confident ✓
- Not confident

10. Does your organization provide secure access to systems and data (e.g., Multi-Factor Authentication (MFA), strong password policies)?

- Yes
- Partially ✓
- No
- Not sure

11. Do you know whom to report a suspected cyber incident to in your organization?

- Yes
- No
- Not sure ✓

12. Have you ever personally experienced a phishing attempt or other cyber incident at work?

- Yes
- No
- Not sure ✓

Section C: Cybersecurity Training (NIST CSF: Protect; ISO 27001: A.7.2)

13. Has your organization provided you with any cybersecurity training in the past 12 months?

- Yes, formal training (online or in-person)
- Yes, informal guidance (emails, reminders, tips) ✓
- No training received

14. If you received training, how often was it provided?

- Once only ✓
- Quarterly
- Annually
- On-demand/as needed

15. How effective was the training in helping you improve your cybersecurity practices?

- Very effective
- Somewhat effective ✓
- Not effective

16. Would you be interested in more frequent or hands-on cybersecurity training (e.g., phishing simulations, scenario exercises)?

- Yes ✓
- Maybe
- No

Section D: Preparedness & Resilience (NIST CSF: Identify, Detect, Respond, Recover; ISO 27001: A.16.1)

17. Does your organization conduct regular risk assessments to identify and manage cybersecurity threats?

- Yes
- No ✓
- Not sure

18. How prepared do you feel your organization is to detect a cyberattack in progress?

- Very prepared
- Somewhat prepared

- Not prepared ✓

19. If a cyber incident occurred (e.g., ransomware attack), how prepared do you feel your organization is to respond?

- Very prepared
- Somewhat prepared
- Not prepared ✓

20. Does your organization have a clear incident response plan or policy in place?

- Yes
- No ✓
- Not sure

21. How confident are you that your organization could recover quickly from a cyber incident?

- Very confident
- Somewhat confident
- Not confident ✓

22. Does your organization regularly back up critical data and test recovery processes?

- Yes, regularly
- Yes, but not regularly tested
- No
- Not sure ✓

23. How quickly do you believe your organization could recover from a major cyber incident?

- Less than 24 hours
- 1-3 days
- 4-7 days
- More than 1 week
- Not sure ✓

Section E: Open-Ended

24. In your opinion, what type of cybersecurity training would be most helpful for you and your team?

Hands on training that teaches us how to recognize phishing emails, create strong passwords, and protect customer data

25. What do you see as the biggest challenge to improving cybersecurity in your organization?

Limited technical knowledge and not having a dedicated IT or cybersecurity tech member. We rely on outside vendors and we don't fully ~~use~~ understand how to secure our systems.

We are also too busy to make time to train ourselves and stay up to date

26. What specific cybersecurity threats concern you most in your daily work?

- Unauthorized access to payment systems.
- Phishing emails that can trick staff into clicking harmful links or sharing sensitive information.

Ms. Lucy Wu
